描述: ALK(R1275Q) 小鼠单抗

背景: Anaplastic lymphoma kinase (ALK) also known as CD246 (cluster of differentiation 246) is a tyrosine kinase receptor that plays an important role in the development of the brain and nervous systems. Deficiencies in ALK, which most commonly as a fusion with other genes, are indicated in cancers.

免疫原: A synthetic peptide from the internal region of ALK which includes the mutation of R1275Q, human origin.
