

AQP1 RABBIT PAB

货号: S219727

产品全名: AQP1 兔多抗

基因符号: CO; CHIP28; AQP-CHIP

UNIPROT ID: P29972 (Gene Accession - NP_932766)

背景: Aquaporins are a family of small integral membrane proteins related to the major intrinsic protein (MIP or AQP0). This gene encodes an aquaporin which functions as a molecular water channel protein. It is a homotetramer with 6 bilayer spanning domains and N-glycosylation sites. The protein physically resembles channel proteins and is abundant in erythrocytes and renal tubes. The gene encoding this aquaporin is a possible candidate for disorders involving imbalance in ocular fluid movement.

抗原: Synthetic peptide of human AQP1

经过测试的应用: ELISA, WB, IHC

推荐稀释比: IHC: 25-100;WB: 500-2000;ELISA: 2000-5000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

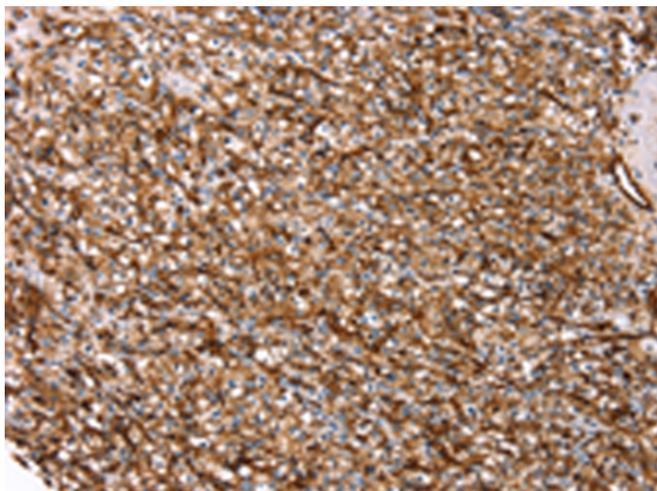

纯化: Antigen affinity purification

种属反应性: Human, Mouse, Rat

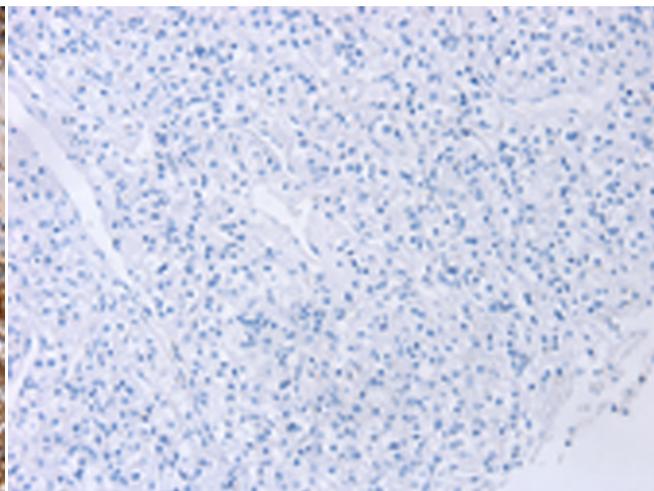

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Metabolism

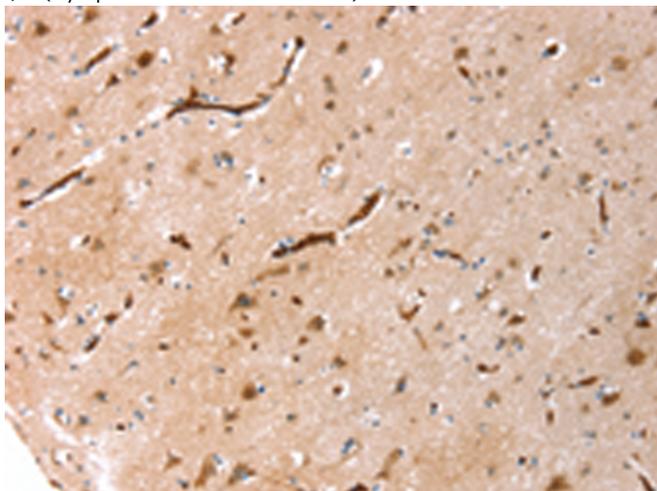

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

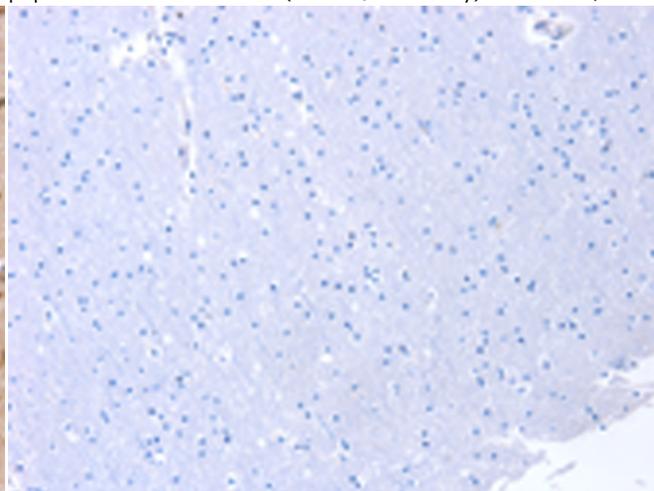

Immunohistochemistry analysis of paraffin embedded Human prostate cancer tissue using 219727(AQPI Antibody) at a dilution of 1/20(Cytoplasm and Cell membrane).

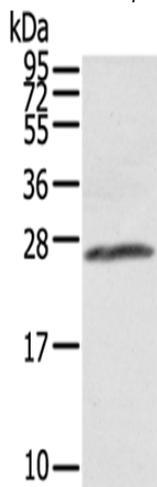

In comparison with the IHC on the left, the same paraffin-embedded Human prostate cancer tissue is first treated with the synthetic peptide and then with 219727(Anti-AQPI Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using 219727(Anti-AQPI Antibody) at a dilution of 1/20.

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with synthetic peptide and then with D260222(Anti-AQPI Antibody) at dilution 1/20.

Gel: 12%SDS-PAGE, Lysate: 40 µg;
Lane: Human normal kidney tissue;
Primary antibody: 219727(AQPI Antibody) at dilution 1/300;
Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution;
Exposure time: 5 seconds

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
