ARSF RABBIT PAB

货号: S210833 产品全名: ARSF 兔多抗

基因符号 ASF

UNIPROT ID: P54793 (Gene Accession - BC022389)

背景: This gene is a member of the sulfatase family, and more specifically, the arylsulfatase subfamily. Members of the subfamily share similarity in sequence and splice sites, and are clustered together on chromosome, x suggesting that they are derived from recent gene duplication events. Sulfatases are essential for the correct composition of bone and cartilage matrix. The activity of this protein, unlike that of arylsulfatase E, is not inhibited by warfarin. Multiple alternatively spliced variants, encoding the same protein, have been identified.

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 210833(ARSF Antibody) at a dilution of 1/20(Cytoplasm).

In comparision with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 210833(Anti-ARSF Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffinembedded Human thyroid cancer tissue using 210833(Anti-ARSF Antibody) at a dilution of 1/20.

In comparision with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with fusion protein and then with D121726(Anti-ARSF Antibody) at dilution 1/20.
