

AVPR1B RABBIT PAB

货号: S221599

产品全名: AVPR1B 兔多抗

基因符号: AVPR3

UNIPROT ID: P47901 (Gene Accession - NP_000698)

背景: The protein encoded by this gene acts as receptor for arginine vasopressin. This receptor belongs to the subfamily of G-protein coupled receptors which includes AVPR1A, V2R and OXT receptors. Its activity is mediated by G proteins which stimulate a phosphatidylinositol-calcium second messenger system. The receptor is primarily located in the anterior pituitary, where it stimulates ACTH release. It is expressed at high levels in ACTH-secreting pituitary adenomas as well as in bronchial carcinoids responsible for the ectopic ACTH syndrome. A spliced antisense transcript of this gene has been reported but its function is not known.

Immunohistochemistry analysis of paraffin embedded Human brain tissue using 221599(AVPR1B Antibody) at a dilution of 1/20(Cell membrane).

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with the synthetic peptide and then with 221599(Anti-AVPR1B Antibody) at dilution 1/20.
