

BOLA1 RABBIT PAB

货号: S218365

产品全名: BOLA1 兔多抗

基因符号: CGI-143

UNIPROT ID: Q9Y3E2 (Gene Accession - BC063405)

背景: BOLA1 (Bola-like protein 1), also known as CGI-143, is a member of the Bola/yrbA family of proteins. Members of this family are homologs of the Escherichia coli protein, Bola. Bola-like proteins are evolutionarily conserved from prokaryotes to eukaryotes and are believed to play a role in cell-cycle regulation or cell proliferation possibly via some sort of transcription regulation of other genes. In addition, Bola-like proteins may contain nucleic-acid binding properties, as is suggested by a fold structure that is similar to the KH-fold, a motif known to participate in nucleic-acid binding. Characteristic of Bola-like proteins which typically consist of approximately 100 amino acids, BOLA1 is a 137 amino acid protein.

抗原: Full length fusion 蛋白

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 40-200; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human, Mouse

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Cell Biology

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 218365(BOLA1 Antibody) at a dilution of 1/35(Nucleus or Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 218365(Anti-BOLA1 Antibody) at dilution 1/35.

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using 218365(Anti-BOLA1 Antibody) at a dilution of 1/35.

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with fusion protein and then with D224266(Anti-BOLA1 Antibody) at dilution 1/35.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
