

## CAVEOLIN 1 RABBIT MAB

货号: N261973

产品全名: Caveolin 1 兔单克隆抗体

基因符号 CAV1; CAV; Caveolin-1

**UNIPROT ID:** Q03135

**背景:** Caveolin-1 may act as a scaffolding protein within caveolar membranes. Interacts directly with G-protein alpha subunits and can functionally regulate their activity (By similarity). Involved in the costimulatory signal essential for T-cell receptor (TCR)-mediated T-cell activation. Its binding to DPP4 induces T-cell proliferation and NF-kappa-B activation in a T-cell receptor/CD3-dependent manner. Recruits CTNNB1 to caveolar membranes and may regulate CTNNB1-mediated signaling through the Wnt pathway.
