

## CLEC2B RABBIT PAB

货号: S216432

产品全名: CLEC2B 兔多抗

基因符号: AICL, IFNRG1, CLECSF2, HPI0085

**UNIPROT ID:** Q92478 (Gene Accession - BC005254)

**背景:** This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a common protein fold and have diverse functions, such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and immune response. The encoded type 2 transmembrane protein may function as a cell activation antigen. An alternative splice variant has been described but its full-length sequence has not been determined. This gene is closely linked to other CTL/CTLD superfamily members on chromosome 12p13 in the natural killer gene complex region.

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 216432(CLEC2B Antibody) at a dilution of 1/50(Cytoplasm, Cell membrane).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 216432(Anti-CLEC2B Antibody) at dilution 1/50.
