

CNBP RABBIT PAB

货号: S218515

产品全名: CNBP 兔多抗

基因符号: DM2; ZNF9; CNBP1; PROMM; RNF163; ZCCHC22

UNIPROT ID: P62633 (Gene Accession - BC000288)

背景: This gene encodes a nucleic-acid binding protein with seven zinc-finger domains. The protein has a preference for binding single stranded DNA and RNA. The protein functions in cap-independent translation of ornithine decarboxylase mRNA, and may also function in sterol-mediated transcriptional regulation. A CCTG expansion from <30 repeats to 75-11000 repeats in the first intron of this gene results in myotonic dystrophy type 2. Multiple transcript variants encoding different isoforms have been found for this gene.

抗原: Fusion protein of human CNBP

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-200; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Epigenetics and Nuclear Signaling

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 218515(CNBP Antibody) at a dilution of 1/65(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 218515(Anti-CNBP Antibody) at dilution 1/65.

The image on the left is immunohistochemistry of paraffin-embedded Human colorectal cancer tissue using 218515(Anti-CNBP Antibody) at a dilution of 1/65.

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with fusion protein and then with D224596(Anti-CNBP Antibody) at dilution 1/65.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
