UNIPROT ID: P25067 (Gene Accession - NP_005193)

背景: This gene encodes the alpha 2 chain of type VIII collagen. This protein is a major component of the basement membrane of the corneal endothelium and forms homo- or heterotrimers with alpha 1 (VIII) type collagens. Defects in this gene are associated with Fuchs endothelial corneal dystrophy and posterior polymorphous corneal dystrophy type 2. Alternative splicing results in multiple transcript variants. Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 221169 (COL8A2 Antibody) at a dilution of 1/50 (secreted).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 221169 (Anti-COL8A2 Antibody) at dilution 1/50.
