

CSF3R RABBIT PAB

货号: S219817

产品全名: CSF3R 兔多抗

基因符号: CD114, GCSFR

UNIPROT ID: Q99062 (Gene Accession - NP_000751)

背景: The protein encoded by this gene is the receptor for colony stimulating factor 3, a cytokine that controls the production, differentiation, and function of granulocytes. The encoded protein, which is a member of the family of cytokine receptors, may also function in some cell surface adhesion or recognition processes. Alternatively spliced transcript variants have been described. Mutations in this gene are a cause of Kostmann syndrome, also known as severe congenital neutropenia.

Immunohistochemistry analysis of paraffin embedded Human lung cancer tissue using 219817 (CSF3R Antibody) at a dilution of 1/12 (Cytoplasm, Cell membrane).

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with the synthetic peptide and then with 219817 (Anti-CSF3R Antibody) at dilution 1/12.
