

DNPEP RABBIT PAB

货号: S218886

产品全名: DNPEP 兔多抗

基因符号: DAP; ASPEP

UNIPROT ID: Q9ULA0 (Gene Accession - BC000653)

背景: The protein encoded by this gene is an aminopeptidase which prefers acidic amino acids, and specifically favors aspartic acid over glutamic acid. It is thought to be a cytosolic protein involved in general metabolism of intracellular proteins. Several transcript variants encoding different isoforms have been found for this gene.

抗原: Fusion protein of human DNPEP

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 25-100; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human, Mouse

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Metabolism

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 218886(DNPEP Antibody) at a dilution of 1/60(Nucleus and Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the fusion protein and then with 218886(Anti-DNPEP Antibody) at dilution 1/60.

The image on the left is immunohistochemistry of paraffin-embedded Human tonsil tissue using 218886(Anti-DNPEP Antibody) at a dilution of 1/60.

In comparison with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with fusion protein and then with D225440(Anti-DNPEP Antibody) at dilution 1/60.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
