

## EIPR1 RABBIT PAB

货号: S217953

产品全名: EIPR1 兔多抗

基因符号 TSSC1; EIPR-1

**UNIPROT ID:** Q53HC9 (Gene Accession - BC002485)

**背景:** This gene has been reported in PMID 9403053 as one of several tumor-suppressing subtransferable fragments located in the imprinted gene domain of 11p15.5, an important tumor-suppressor gene region. Alterations in this region have been associated with the Beckwith-Wiedemann syndrome, Wilms tumor, rhabdomyosarcoma, adrenocortical carcinoma, and lung, ovarian, and breast cancer. Alignment of this gene to genomic sequence data suggests that this gene resides on chromosome 2 rather than chromosome 11. [provided by RefSeq, Dec 2008]

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 217953(EIPR1 Antibody) at a dilution of 1/25(Cytoplasm and Cell membrane).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 217953(Anti-EIPR1 Antibody) at dilution 1/25.
