

ELN RABBIT PAB

货号: S210290

产品全名: ELN 兔多抗

基因符号: WS, WBS, SVAS

UNIPROT ID: P15502 (Gene Accession - BC065566)

背景: This gene encodes a protein that is one of the two components of elastic fibers. The encoded protein is rich in hydrophobic amino acids such as glycine and proline, which form mobile hydrophobic regions bounded by crosslinks between lysine residues. Deletions and mutations in this gene are associated with supravalvular aortic stenosis (SVAS) and autosomal dominant cutis laxa. Multiple transcript variants encoding different isoforms have been found for this gene.

Immunohistochemistry analysis of paraffin embedded Human ovarian cancer tissue using 210290(ELN Antibody) at a dilution of 1/50(Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human ovarian cancer tissue is first treated with the fusion protein and then with 210290(Anti-ELN Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human colon cancer tissue using 210290(Anti-ELN Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human colon cancer tissue is first treated with fusion protein and then with D120588(Anti-ELN Antibody) at dilution 1/50.
