

FCSK RABBIT PAB

货号: S219448

产品全名: FCSK 兔多抗

基因符号: FUK; 1110046B12Rik

UNIPROT ID: Q8N0W3 (Gene Accession - BC032542)

背景: The protein encoded by this gene belongs to the GHMP (galacto-, homoserine, mevalonate and phosphomevalonate) kinase family and catalyzes the phosphorylation of L-fucose to form beta-L-fucose 1-phosphate. This enzyme catalyzes the first step in the utilization of free L-fucose in glycoprotein and glycolipid synthesis. L-fucose may be important in mediating a number of cell-cell interactions such as blood group antigen recognition, inflammation, and metastasis. While several transcript variants may exist for this gene, the full-length nature of only one has been described to date. [provided by RefSeq, Jul 2008]

抗原: Fusion protein of human FCSK

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 150-300; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human, Mouse

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Signal Transduction

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human colorectal cancer tissue using 219448(FCSK Antibody) at a dilution of 1/140(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with the fusion protein and then with 219448(Anti-FCSK Antibody) at dilution 1/140.

The image on the left is immunohistochemistry of paraffin-embedded Human tonsil tissue using 219448(Anti-FCSK Antibody) at a dilution of 1/140.

In comparison with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with fusion protein and then with D227113(Anti-FCSK Antibody) at dilution 1/140.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
