

## FOXP4 RABBIT PAB

货号: S221238

产品全名: FOXP4 兔多抗

基因符号 hFKHLA

**UNIPROT ID:** Q81VH2 (Gene Accession - NP\_001012426)

**背景:** This gene belongs to subfamily P of the forkhead box (FOX) transcription factor family. Forkhead box transcription factors play important roles in the regulation of tissue- and cell type-specific gene transcription during both development and adulthood. Many members of the forkhead box gene family, including members of subfamily P, have roles in mammalian oncogenesis. This gene may play a role in the development of tumors of the kidney and larynx. Alternative splicing of this gene produces multiple transcript variants, some encoding different isoforms.
