Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 220581(GNPAT Antibody) at a dilution of 1/30(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the synthetic peptide and then with 220581(Anti-GNPAT Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using 220581(Anti-GNPAT Antibody) at a dilution of 1/30.

In comparison with the IHC on the left, the same paraffin-embedded Human gastric cancer tissue is first treated with synthetic peptide and then with D261720(Anti-GNPAT Antibody) at dilution 1/30.
