

HINT1 RABBIT PAB

货号: S220596

产品全名: HINT1 兔多抗

基因符号: HINT; NMAN; PKCI-1; PRKCNH1

UNIPROT ID: P49773 (Gene Accession - NP_005331)

背景: The protein encoded by this gene can hydrolyze substrates such as AMP-morpholidate, AMP-N-alanine methyl ester, AMP-alpha-acetyl lysine methyl ester, and AMP-NH₂. The encoded protein interacts with these substrates via a histidine triad motif, which is part of the loop that binds to the substrate. This gene has been found to be a tumor suppressing gene. Several transcript variants, but only one of them protein-coding, have been found for this gene.

Immunohistochemistry analysis of paraffin embedded Human gastric cancer tissue using 220596(HINT1 Antibody) at a dilution of 1/50(Cytoplasm or Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human gastric cancer tissue is first treated with the synthetic peptide and then with 220596(Anti-HINT1 Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using 220596(Anti-HINT1 Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with synthetic peptide and then with D261741(Anti-HINT1 Antibody) at dilution 1/50.
