

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

HYI RABBIT PAB

货号: S219228 产品全名: HYI 兔多抗 基因符号 HT036

UNIPROT ID: Q5T013 (Gene Accession - BC019041)

背景: This gene encodes a putative hydroxypyruvate isomerase, which likely catalyzes the conversion of hydroxypyruvate to 2-hydroxy-3-oxopropanoate, and may be involved in carbohydrate transport and metabolism. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

抗原: Fusion protein of human HYI 经过测试的应用: ELISA, WB, IHC

推荐稀释比: IHC: 50-200;WB: 500-2000;ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG 纯化: Antigen affinity purification 种属反应性: Human, Mouse

成分: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

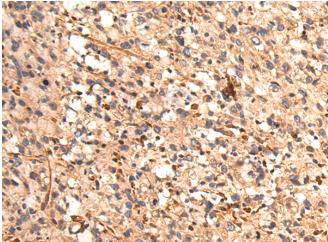

研究领域: Signal Transduction, Metabolism

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

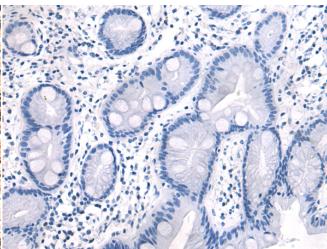

Product Description

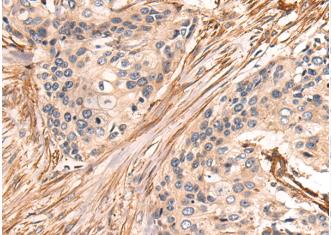

Pioneering GTPase and Oncogene Product Development since 2010

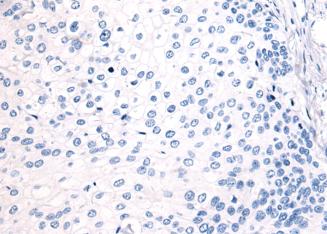

Immunohistochemistry analysis of paraffin embedded Human gastric cancer tissue using 219228(HYI Antibody) at a dilution of 1/65(Cytoplasm).

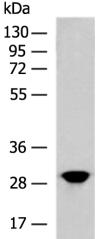

In comparision with the IHC on the left, the same paraffin-embedded Human gastric cancer tissue is first treated with the fusion protein and then with 219228(Anti-HYI Antibody) at dilution 1/65.

The image on the left is immunohistochemistry of paraffinembedded Human cervical cancer tissue using 219228 (Anti-HYI Antibody) at a dilution of 1/65.

In comparision with the IHC on the left, the same paraffin-embedded Human cervical cancer tissue is first treated with fusion protein and then with D226090(Anti-HYI Antibody) at dilution 1/65.

Gel: 8%SDS-PAGE, Lysate: 40 µg; Lane: HL-60 cell lysate; Primary antibody: 219228(HYI Antibody) at dilution 1/700; Secondary antibody: HRP-conjugated Goat anti rabbit IgG at 1/5000 dilution;

Exposure time: 30 seconds
