

IFNG RABBIT PAB

货号: S210375

产品全名: IFNG 兔多抗

基因符号 IFG; IFI; IMD69

UNIPROT ID: P01579 (Gene Accession - BC070256)

背景: This gene encodes a soluble cytokine that is a member of the type II interferon class. The encoded protein is secreted by cells of both the innate and adaptive immune systems. The active protein is a homodimer that binds to the interferon gamma receptor which triggers a cellular response to viral and microbial infections. Mutations in this gene are associated with an increased susceptibility to viral, bacterial and parasitic infections and to several autoimmune diseases. [provided by RefSeq, Dec 2015]

抗原: Fusion protein of human IFNG

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-200; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Immunology, Stem Cells, Cancer

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human colorectal cancer tissue using 210375(IFNG Antibody) at a dilution of 1/75(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with the fusion protein and then with 210375(Anti-IFNG Antibody) at dilution 1/75.

The image on the left is immunohistochemistry of paraffin-embedded Human cervical cancer tissue using 210375(Anti-IFNG Antibody) at a dilution of 1/75.

In comparison with the IHC on the left, the same paraffin-embedded Human cervical cancer tissue is first treated with fusion protein and then with D120806(Anti-IFNG Antibody) at dilution 1/75.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
