

ITGAE RABBIT PAB

货号: S217544

产品全名: ITGAE 兔多抗

基因符号: CD103; HUMINAE

UNIPROT ID: P38570 (Gene Accession - BC113436)

背景: Integrins are heterodimeric integral membrane proteins composed of an alpha chain and a beta chain. This gene encodes an I-domain-containing alpha integrin that undergoes post-translational cleavage in the extracellular domain, yielding disulfide-linked heavy and light chains. In combination with the beta 7 integrin, this protein forms the E-cadherin binding integrin known as the human mucosal lymphocyte-1 antigen. This protein is preferentially expressed in human intestinal intraepithelial lymphocytes (IEL), and in addition to a role in adhesion, it may serve as an accessory molecule for IEL activation.

抗原: Fusion protein of human ITGAE

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-200; ELISA: 2000-5000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Signal Transduction, Immunology, Stem Cells

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human colon cancer tissue using 217544(ITGAE Antibody) at a dilution of 1/60(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human colon cancer tissue is first treated with the fusion protein and then with 217544(Anti-ITGAE Antibody) at dilution 1/60.

The image on the left is immunohistochemistry of paraffin-embedded Human lung cancer tissue using 217544(Anti-ITGAE Antibody) at a dilution of 1/60.

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with fusion protein and then with D222552(Anti-ITGAE Antibody) at dilution 1/60.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
