

JUND RABBIT PAB

货号: S219697

产品全名: JUND 兔多抗

基因符号 AP-1

UNIPROT ID: P17535 (Gene Accession - NP_005345)

背景: The protein encoded by this intronless gene is a member of the JUN family, and a functional component of the AP1 transcription factor complex. This protein has been proposed to protect cells from p53-dependent senescence and apoptosis. Alternative translation initiation site usage results in the production of different isoforms (PMID:12105216). [provided by RefSeq, Nov 2013]

Immunohistochemistry analysis of paraffin embedded Human breast cancer tissue using 219697(JUND Antibody) at a dilution of 1/40(Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human breast cancer tissue is first treated with the synthetic peptide and then with 219697(Anti-JUND Antibody) at dilution 1/40.
