KLF2 RABBIT PAB

货号: S220660 产品全名: KLF2 兔多抗 基因符号 LKLF

UNIPROT ID: Q9Y5W3 (Gene Accession - NP_057354)

背景: This gene encodes a protein that belongs to the Kruppel family of transcription factors. The encoded zinc finger protein is expressed early in mammalian development and is found in many different cell types. The protein acts to bind the CACCC box found in the promoter of target genes to activate their transcription. It plays a role in many processes during development and disease including adipogenesis, embryonic erythropoiesis, epithelial integrity, inflammation and t-cell viability.
