

MDK RABBIT PAB

货号: S210452

产品全名: MDK 兔多抗

基因符号 MK, ARAP, NEGF2

UNIPROT ID: P21741 (Gene Accession - BC011704)

背景: This gene encodes a member of a small family of secreted growth factors that binds heparin and responds to retinoic acid. The encoded protein promotes cell growth, migration, and angiogenesis, in particular during tumorigenesis. This gene has been targeted as a therapeutic for a variety of different disorders. Alternatively spliced transcript variants encoding multiple isoforms have been observed.

抗原: Fusion protein of human MDK

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-200; ELISA: 2000-5000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Neuroscience

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human colon cancer tissue using 210452(MDK Antibody) at a dilution of 1/60(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human colon cancer tissue is first treated with the fusion protein and then with 210452(Anti-MDK Antibody) at dilution 1/60.

The image on the left is immunohistochemistry of paraffin-embedded Human lung cancer tissue using 210452(Anti-MDK Antibody) at a dilution of 1/60.

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with fusion protein and then with D120984(Anti-MDK Antibody) at dilution 1/60.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
