MMP28 RABBIT PAB

传号: S216652 产品全名: MMP28 兔多抗 基因符号 MM28; MMP25; MMP-25; MMP-28; EPILYSIN **UNIPROT ID:** Q9H239 (Gene Accession - BC002631) 背景: Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix for both normal physiological processes, such as embryonic development, reproduction and tissue remodeling, and disease processes, such as asthma and metastasis. This gene encodes a secreted enzyme that degrades casein. Its expression pattern suggests that it plays a role in tissue homeostasis

and in wound repair. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq, Apr 2014] 抗原: Fusion protein of human MMP28
