

NCSTN RABBIT PAB

货号: S217648

产品全名: NCSTN 兔多抗

基因符号 ATAG1874

UNIPROT ID: Q92542 (Gene Accession - BC047621)

背景: This gene encodes a type I transmembrane glycoprotein that is an integral component of the multimeric gamma-secretase complex. The encoded protein cleaves integral membrane proteins, including Notch receptors and beta-amyloid precursor protein, and may be a stabilizing cofactor required for gamma-secretase complex assembly.

抗原: Fusion protein of human NCSTN

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-200; ELISA: 2000-5000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human, Mouse, Rat

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Neuroscience, Signal Transduction

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 217648(NCSTN Antibody) at a dilution of 1/50(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 217648(Anti-NCSTN Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using 217648(Anti-NCSTN Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with fusion protein and then with D222764(Anti-NCSTN Antibody) at dilution 1/50.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
