

NPC1 RABBIT PAB

货号: S220759

产品全名: NPC1 兔多抗

基因符号: NPC

UNIPROT ID: O15118 (Gene Accession - NP_000262)

背景: This gene encodes a large protein that resides in the limiting membrane of endosomes and lysosomes and mediates intracellular cholesterol trafficking via binding of cholesterol to its N-terminal domain. It is predicted to have a cytoplasmic C-terminus, 13 transmembrane domains, and 3 large loops in the lumen of the endosome - the last loop being at the N-terminus. This protein transports low-density lipoproteins to late endosomal/lysosomal compartments where they are hydrolyzed and released as free cholesterol.

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 220759(NPC1 Antibody) at a dilution of 1/40(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 220759(Anti-NPC1 Antibody) at dilution 1/40.
