

PHD1 RABBIT PAB

货号: N225560

产品全名: PHD1 兔多抗

基因符号 Estrogen-induced tag 6; HPH-3; PHD1

UNIPROT ID: Q96KS0

背景: Cellular oxygen sensor that catalyzes, under normoxic conditions, the post-translational formation of 4-hydroxyproline in hypoxia-inducible factor (HIF) alpha proteins. Hydroxylates a specific proline found in each of the oxygen-dependent degradation (ODD) domains (N-terminal, NODD, and C-terminal, CODD) of HIF1A. Also hydroxylates HIF2A. Has a preference for the CODD site for both HIF1A and HIF2A. Hydroxylated HIFs are then targeted for proteasomal degradation via the von Hippel-Lindau ubiquitination complex.

抗原: A synthesized peptide derived from human PHD1/prolyl hydroxylase
