

PHOSPHO-RB (SER807) RABBIT PAB

货号: N226072

产品全名: Phospho-Rb (Ser807) 兔多抗

基因符号 RB1; Retinoblastoma-associated protein; p105-Rb; pRb; Rb; pp110

UNIPROT ID: P06400

背景: Cell cycle-dependent phosphorylation by a CDK inhibits Rb target binding and allows cell cycle progression. Rb inactivation and subsequent cell cycle progression likely requires an initial phosphorylation by cyclin D-CDK4/6 followed by cyclin E-CDK2 phosphorylation. Specificity of different CDK/cyclin complexes has been observed in vitro and cyclin D1 is required for Ser780 phosphorylation in vivo.
