货号: S220169

产品全名: PODXL 兔多抗

基因符号: PC, PCLP, Gp200, PCLP-1

**UNIPROT ID:** O00592 (Gene Accession - NP\_005388)

**背景:** This gene encodes a member of the sialomucin protein family. The encoded protein was originally identified as an important component of glomerular podocytes. Podocytes are highly differentiated epithelial cells with interdigitating foot processes covering the outer aspect of the glomerular basement membrane. Other biological activities of the encoded protein include: binding in a membrane protein complex with Na<sup>+</sup>/H<sup>+</sup> exchanger regulatory factor to intracellular cytoskeletal elements, playing a role in hematopoietic cell differentiation, and being expressed in vascular endothelium cells and binding to L-selectin.

Immunohistochemistry analysis of paraffin embedded Human brain tissue using 220169(PODXL Antibody) at a dilution of 1/20(Cytoplasm, Apical Cell membrane).

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with the synthetic peptide and then with 220169(Anti-PODXL Antibody) at dilution 1/20.

The image on the left is immunohistochemistry of paraffin-embedded Human ovarian cancer tissue using 220169(Anti-PODXL Antibody) at a dilution of 1/20.

In comparison with the IHC on the left, the same paraffin-embedded Human ovarian cancer tissue is first treated with synthetic peptide and then with D261076(Anti-PODXL Antibody) at dilution 1/20.
