

PSMD10 RABBIT PAB

货号: S210557

产品全名: PSMD10 兔多抗

基因符号: p28; p28(GANK); dJ889N15.2

UNIPROT ID: O75832 (Gene Accession - BC011960)

背景: This gene encodes a subunit of the PA700/19S complex, which is the regulatory component of the 26S proteasome. The 26S proteasome complex is required for ubiquitin-dependent protein degradation. This protein is a non-ATPase subunit that may be involved in protein-protein interactions. Aberrant expression of this gene may play a role in tumorigenesis. Two transcripts encoding different isoforms have been described. Pseudogenes have been identified on chromosomes 3 and 20.

Immunohistochemistry analysis of paraffin embedded Human lung cancer tissue using 210557(PSMD10 Antibody) at a dilution of 1/40(Nucleus and Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with the fusion protein and then with 210557(Anti-PSMD10 Antibody) at dilution 1/40.
