

SELE RABBIT PAB

货号: S216754

产品全名: SELE 兔多抗

基因符号: ELAM; ESEL; CD62E; ELAM1; LECAM2

UNIPROT ID: P16581 (Gene Accession - BC131551)

背景: The protein encoded by this gene is found in cytokine-stimulated endothelial cells and is thought to be responsible for the accumulation of blood leukocytes at sites of inflammation by mediating the adhesion of cells to the vascular lining. It exhibits structural features such as the presence of lectin- and EGF-like domains followed by short consensus repeat (SCR) domains that contain 6 conserved cysteine residues. These proteins are part of the selectin family of cell adhesion molecules. Adhesion molecules participate in the interaction between leukocytes and the endothelium and appear to be involved in the pathogenesis of atherosclerosis.

抗原: Fusion protein of human SELE

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-200; ELISA: 2000-5000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Cardiovascular, Immunology, Stem Cells

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 216754(SELE Antibody) at a dilution of 1/30(Cell membrane, Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the fusion protein and then with 216754(Anti-SELE Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffin-embedded Human lung cancer tissue using 216754(Anti-SELE Antibody) at a dilution of 1/30.

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with fusion protein and then with D221179(Anti-SELE Antibody) at dilution 1/30.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
