

## SENP1 RABBIT PAB

货号: S214666

产品全名: SENP1 兔多抗

基因符号: SuPr-2

**UNIPROT ID:** Q9P0U3 (Gene Accession - NP\_001254523)

**背景:** This gene encodes a cysteine protease that specifically targets members of the small ubiquitin-like modifier (SUMO) protein family. This protease regulates SUMO pathways by deconjugating sumoylated proteins. This protease also functions to process the precursor SUMO proteins into their mature form. Alternate splicing results in multiple transcript variants.

Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 214666 (SENPI Antibody) at a dilution of 1/35 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the synthetic peptide and then with 214666 (Anti-SENPI Antibody) at dilution 1/35.

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using 214666 (Anti-SENPI Antibody) at a dilution of 1/35.

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with synthetic peptide and then with D162184 (Anti-SENPI Antibody) at dilution 1/35.
