

SLC17A7 RABBIT PAB

货号: S213287

产品全名: SLC17A7 兔多抗

基因符号 BNPI; VGLUT1

UNIPROT ID: Q9P2U7 (Gene Accession - NP_064705)

背景: The protein encoded by this gene is a vesicle-bound, sodium-dependent phosphate transporter that is specifically expressed in the neuron-rich regions of the brain. It is preferentially associated with the membranes of synaptic vesicles and functions in glutamate transport. The protein shares 82% identity with the differentiation-associated Na-dependent inorganic phosphate cotransporter and they appear to form a distinct class within the Na⁺/Pi cotransporter family.

Immunohistochemistry analysis of paraffin embedded Human brain tissue using 213287(SLC17A7 Antibody) at a dilution of 1/200(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with the synthetic peptide and then with 213287(Anti-SLC17A7 Antibody) at dilution 1/200.
