

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

SNX6 RABBIT PAB

货号: S221840 产品全名: SNX6 兔多抗 基因符号 TFAF2; MSTP010

UNIPROT ID: Q9UNH7 (Gene Accession - NP_067072)

背景: This gene encodes a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein associates with the long isoform of the leptin receptor, the transforming growth factor-beta family of receptor serine-threonine kinases, and with receptor tyrosine kinases for platelet-derived growth factor, insulin, and epidermal growth factor. This protein may form oligomeric complexes with family member proteins through interactions of both the PX domain and the coiled coil regions of the molecules. Translocation of this protein from the cytoplasm to the nucleus occurs after binding to proviral integration site 1 protein. This gene results in two transcripts encoding two distinct isoforms.

抗原: Synthetic peptide of human SNX6

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-300; ELISA: 5000-10000

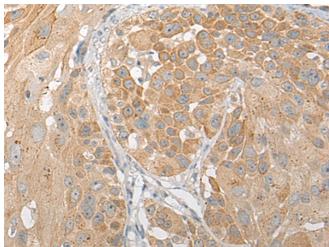

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

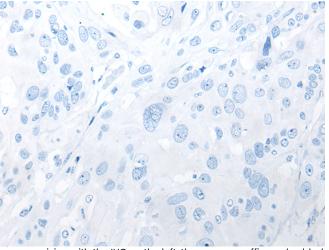

亚型: Immunogen-specific rabbit IgG 纯化: Antigen affinity purification 种属反应性: Human, Mouse

成分: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

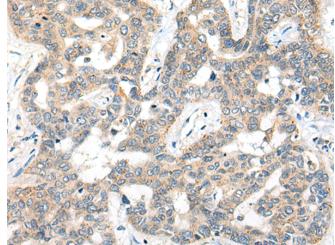

研究领域: Signal Transduction, Stem Cells, Developmental Biology 储存和运输: Store at -20°C. Avoid repeated freezing and thawing

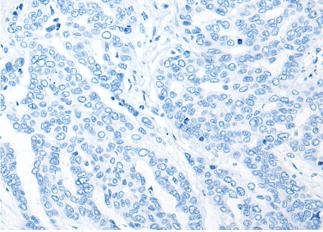

Immunohistochemistry analysis of paraffin embedded Human esophagus cancer tissue using 221840(SNX6 Antibody) at a dilution of 1/50(Cytoplasm).

In comparision with the IHC on the left, the same paraffin-embedded Human esophagus cancer tissue is first treated with the synthetic peptide and then with 221840(Anti-SNX6 Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffinembedded Human liver cancer tissue using 221840(Anti-SNX6

In comparision with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with synthetic peptide and
