

SRGN RABBIT PAB

货号: S217852

产品全名: SRGN 兔多抗

基因符号: PPG; PRG; PRG1

UNIPROT ID: P10124 (Gene Accession - BC015516)

背景: This gene encodes a protein best known as a hematopoietic cell granule proteoglycan. Proteoglycans stored in the secretory granules of many hematopoietic cells also contain a protease-resistant peptide core, which may be important for neutralizing hydrolytic enzymes. This encoded protein was found to be associated with the macromolecular complex of granzymes and perforin, which may serve as a mediator of granule-mediated apoptosis.

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 217852(SRGN Antibody) at a dilution of 1/20(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 217852(Anti-SRGN Antibody) at dilution 1/20.
