

STK32C RABBIT PAB

货号: S218867

产品全名: STK32C 兔多抗

基因符号: PKE; YANK3

UNIPROT ID: Q86UX6 (Gene Accession - BC015792)

背景: The protein encoded by this gene is a member of the serine/threonine protein kinase family. It is thought that this family member is functional in brain due to its high expression levels there. DNA methylation differences have been found in this gene in monozygotic twins that are discordant for adolescent depression. Alternative splicing results in multiple transcript variants.

抗原: Fusion protein of human STK32C

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-300; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

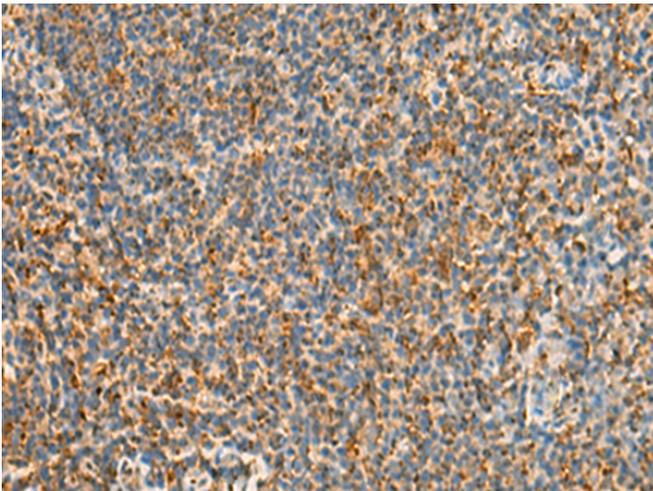

纯化: Antigen affinity purification

种属反应性: Human, Mouse

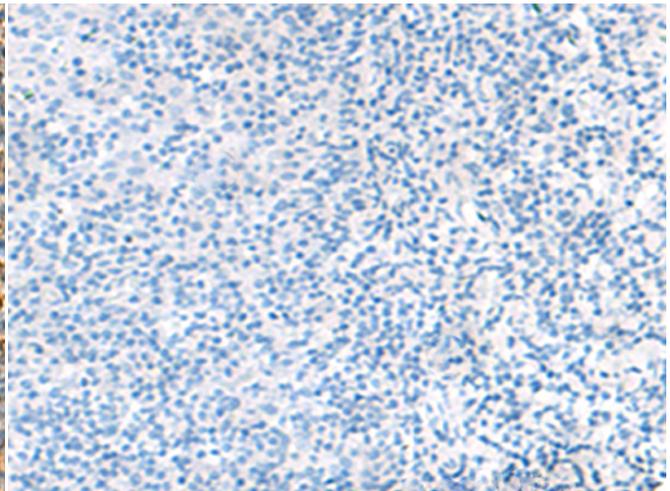

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Signal Transduction

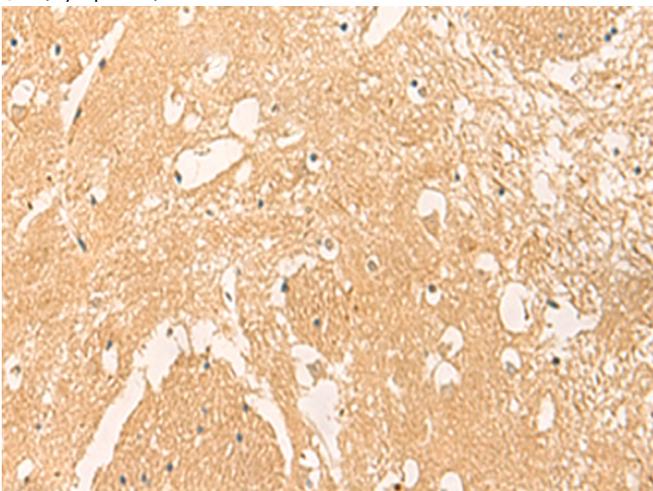

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

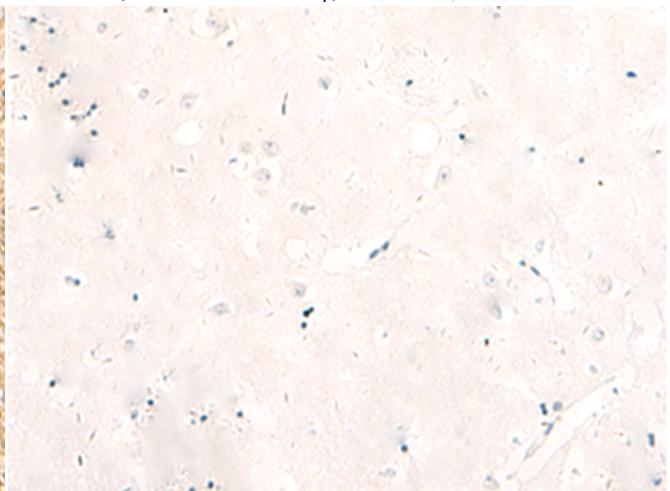

Immunohistochemistry analysis of paraffin embedded Human tonsil tissue using 218867 (STK32C Antibody) at a dilution of 1/40 (Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with the fusion protein and then with 218867 (Anti-STK32C Antibody) at dilution 1/40.

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using 218867 (Anti-STK32C Antibody) at a dilution of 1/40.

In comparison with the IHC on the left, the same paraffin-embedded Human brain tissue is first treated with fusion protein and then with D225406 (Anti-STK32C Antibody) at dilution 1/40.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
