

## TERT RABBIT PAB

货号: S219857

产品全名: TERT 兔多抗

基因符号 TP2; TRT; CMM9; EST2; TCS1; hTRT; DKCA2; DKCB4; hEST2; PFBMFT1

**UNIPROT ID:** O14746 (Gene Accession - NP\_937983)

**背景:** Telomerase is a ribonucleoprotein polymerase that maintains telomere ends by addition of the telomere repeat TTAGGG. The enzyme consists of a protein component with reverse transcriptase activity, encoded by this gene, and an RNA component which serves as a template for the telomere repeat. Telomerase expression plays a role in cellular senescence, as it is normally repressed in postnatal somatic cells resulting in progressive shortening of telomeres. Deregulation of telomerase expression in somatic cells may be involved in oncogenesis. Studies in mouse suggest that telomerase also participates in chromosomal repair, since de novo synthesis of telomere repeats may occur at double-stranded breaks. Alternatively spliced variants encoding different isoforms of telomerase reverse transcriptase have been identified; the full-length sequence of some variants has not been determined. Alternative splicing at this locus is thought to be one mechanism of regulation of telomerase activity.

**抗原:** Synthetic peptide of human TERT

**经过测试的应用:** ELISA, WB, IHC

**推荐稀释比:** IHC: 100-300;WB: 500-2000;ELISA: 5000-10000

**种属反应性:** Rabbit

**克隆性:** Rabbit Polyclonal

**亚型:** Immunogen-specific rabbit IgG

**纯化:** Antigen affinity purification

**种属反应性:** Human

**成分:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

**研究领域:** Epigenetics and Nuclear Signaling,Cancer,Stem Cells,Developmental Biology

**储存和运输:** Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human colorectal cancer tissue using 219857(TERT Antibody) at a dilution of 1/70(Nucleus and Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human colorectal cancer tissue is first treated with the synthetic peptide and then with 219857(Anti-TERT Antibody) at dilution 1/70.

The image on the left is immunohistochemistry of paraffin-embedded Human tonsil tissue using 219857(Anti-TERT Antibody) at a dilution of 1/70.

In comparison with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with synthetic peptide and then with D260502(Anti-TERT Antibody) at dilution 1/70.

kDa

Gel: 6%SDS-PAGE, Lysate: 40 µg;  
 Lane: Human mucinous type of soft tissue sarcoma tissue lysate;  
 Primary antibody: 219857(TERT Antibody) at dilution 1/700;  
 Secondary antibody: HRP-conjugated Goat anti rabbit IgG at 1/5000 dilution;  
 Exposure time: 90 seconds

# Product Description

Pioneering GTPase and Oncogene Product Development since 2010
