

TNFAIP2 RABBIT PAB

货号: S217927

产品全名: TNFAIP2 兔多抗

基因符号 B94; EXOC3L3

UNIPROT ID: Q03169 (Gene Accession - BC128449)

背景: This gene was identified as a gene whose expression can be induced by the tumor necrosis factor alpha (TNF) in umbilical vein endothelial cells. The expression of this gene was shown to be induced by retinoic acid in a cell line expressing a oncogenic version of the retinoic acid receptor alpha fusion protein, which suggested that this gene may be a retinoic acid target gene in acute promyelocytic leukemia.

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 217927(TNFAIP2 Antibody) at a dilution of 1/40(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the fusion protein and then with 217927(Anti-TNFAIP2 Antibody) at dilution 1/40.
