

TRANSFERRIN RABBIT PAB

货号: N225062

产品全名: Transferrin 兔多抗

基因符号 TF; Serotransferrin; Transferrin; Beta-1 metal-binding globulin; Siderophilin

UNIPROT ID: P02787

背景: Transferrins are iron binding transport proteins which can bind two Fe³⁺ ions in association with the binding of an anion, usually bicarbonate. It is responsible for the transport of iron from sites of absorption and heme degradation to those of storage and utilization. Serum transferrin may also have a further role in stimulating cell proliferation.

抗原: The antiserum was produced against synthesized peptide derived from the C-terminal region of human TF. AA range:611-660
