

UBD RABBIT PAB

货号: S218981

产品全名: UBD 兔多抗

基因符号: FAT10; UBD-3; GABBR1

UNIPROT ID: O15205 (Gene Accession - BC012472)

背景: This gene encodes a protein which contains two ubiquitin-like domains and appears to have similar function to ubiquitin. Through covalent attachment, the encoded protein targets other proteins for 26S proteasome degradation. This protein has been implicated to function in many cellular processes, including caspase-dependent apoptosis, formation of aggresomes, mitotic regulation, and dendritic cell maturation. Upregulation of this gene may promote inflammation in chronic kidney disease and has been observed in many cancer types.

抗原: Fusion protein of human UBD

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 50-300; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Cell Biology, Immunology

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human tonsil tissue using 218981(UBD Antibody) at a dilution of 1/50(Cytoplasm or Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human tonsil tissue is first treated with the fusion protein and then with 218981(Anti-UBD Antibody) at dilution 1/50.

The image on the left is immunohistochemistry of paraffin-embedded Human lung cancer tissue using 218981(Anti-UBD Antibody) at a dilution of 1/50.

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with fusion protein and then with D225602(Anti-UBD Antibody) at dilution 1/50.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
