

VAMP5 RABBIT PAB

货号: S217998

产品全名: VAMP5 兔多抗

基因符号

UNIPROT ID: O95183 (Gene Accession - BC017891)

背景: Synaptobrevins/VAMPs, syntaxins, and the 25-kD synaptosomal-associated protein are the main components of a protein complex involved in the docking and/or fusion of vesicles and cell membranes. The VAMP5 gene is a member of the vesicle-associated membrane protein (VAMP)/synaptobrevin family and the SNARE superfamily. This VAMP family member may participate in vesicle trafficking events that are associated with myogenesis.

抗原: Full length fusion 蛋白

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 25-100; ELISA: 2000-5000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Signal Transduction

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human prostate cancer tissue using 217998(VAMP5 Antibody) at a dilution of 1/30(Cell membrane and Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human prostate cancer tissue is first treated with the fusion protein and then with 217998(Anti-VAMP5 Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using 217998(Anti-VAMP5 Antibody) at a dilution of 1/30.

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with fusion protein and then with D223521(Anti-VAMP5 Antibody) at dilution 1/30.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
