

## VEZT RABBIT PAB

货号: S221565

产品全名: VEZT 兔多抗

基因符号: VEZATIN

**UNIPROT ID:** Q9HBM0 (Gene Accession - NP\_060069)

**背景:** This gene encodes a transmembrane protein which has been localized to adherens junctions and shown to bind to myosin VIIA. Examination of expression of this gene in gastric cancer tissues have shown that expression is decreased which appears to be related to hypermethylation of the promoter. Expression of this gene may also be inhibited by binding of a specific microRNA to a target sequence in the 3' UTR of the transcripts. A pseudogene of this gene is located on the X chromosome. Alternative splicing results in multiple transcript variants.

Immunohistochemistry analysis of paraffin embedded Human thyroid cancer tissue using 221565(VEZT Antibody) at a dilution of 1/50(Cytoplasm and Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human thyroid cancer tissue is first treated with the synthetic peptide and then with 221565(Anti-VEZT Antibody) at dilution 1/50.
