

## VNN1 RABBIT PAB

货号: S222849

产品全名: VNN1 兔多抗

基因符号 HDLCQ8; Tiff66

**UNIPROT ID:** O95497 (Gene Accession - NP\_004657 )

**背景:** This gene encodes a member of the vanin family of proteins, which share extensive sequence similarity with each other, and also with biotinidase. The family includes secreted and membrane-associated proteins, a few of which have been reported to participate in hematopoietic cell trafficking. No biotinidase activity has been demonstrated for any of the vanin proteins, however, they possess pantetheinase activity, which may play a role in oxidative-stress response. This protein, like its mouse homolog, is likely a GPI-anchored cell surface molecule. The mouse protein is expressed by the perivascular thymic stromal cells and regulates migration of T-cell progenitors to the thymus. This gene lies in close proximity to, and in the same transcriptional orientation as, two other vanin genes on chromosome 6q23-q24.

**抗原:** Synthetic peptide of human VNN1

**经过测试的应用:** ELISA, IF

**推荐稀释比:** ELISA: 5000-240000

**种属反应性:** Rabbit

**克隆性:** Rabbit Polyclonal

**亚型:** Immunogen-specific rabbit IgG

**纯化:** Antigen affinity purification

**种属反应性:** Human

**成分:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

**研究领域:** Metabolism, Cell Biology, Cardiovascular, Stem Cells

**储存和运输:** Store at -20°C. Avoid repeated freezing and thawing
