

VTN RABBIT PAB

货号: S213290

产品全名: VTN 兔多抗

基因符号: VN; V75; VNT

UNIPROT ID: P04004 (Gene Accession - NP_000629)

背景: The protein encoded by this gene is a member of the pexin family. It is found in serum and tissues and promotes cell adhesion and spreading, inhibits the membrane-damaging effect of the terminal cytolytic complement pathway, and binds to several serpin serine protease inhibitors. It is a secreted protein and exists in either a single chain form or a clipped, two chain form held together by a disulfide bond.

抗原: Synthetic peptide of human VTN

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 100-300; ELISA: 2000-20000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Cardiovascular, Immunology

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 213290(VTN Antibody) at a dilution of 1/100(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 213290(Anti-VTN Antibody) at dilution 1/100.

The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using 213290(Anti-VTN Antibody) at a dilution of 1/100.

In comparison with the IHC on the left, the same paraffin-embedded Human gastric cancer tissue is first treated with synthetic peptide and then with D151145(Anti-VTN Antibody) at dilution 1/100.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
