

WRN RABBIT PAB

货号: S221547

产品全名: WRN 兔多抗

基因符号 RECQ3; RECQL2; RECQL3

UNIPROT ID: Q14191 (Gene Accession - NP_000544)

背景: This gene encodes a member of the RecQ subfamily and the DEAH (Asp-Glu-Ala-His) subfamily of DNA and RNA helicases. DNA helicases are involved in many aspects of DNA metabolism, including transcription, replication, recombination, and repair. This protein contains a nuclear localization signal in the C-terminus and shows a predominant nucleolar localization. It possesses an intrinsic 3' to 5' DNA helicase activity, and is also a 3' to 5' exonuclease. Based on interactions between this protein and Ku70/80 heterodimer in DNA end processing, this protein may be involved in the repair of double strand DNA breaks. Defects in this gene are the cause of Werner syndrome, an autosomal recessive disorder characterized by premature aging.

抗原: Synthetic peptide of human WRN

经过测试的应用: ELISA, IHC

推荐稀释比: IHC: 25-100; ELISA: 5000-10000

种属反应性: Rabbit

克隆性: Rabbit Polyclonal

亚型: Immunogen-specific rabbit IgG

纯化: Antigen affinity purification

种属反应性: Human

成分: PBS (without Mg²⁺ and Ca²⁺), pH 7.4, 150 mM NaCl, 0.05% Sodium Azide and 40% glycerol

研究领域: Epigenetics and Nuclear Signaling

储存和运输: Store at -20°C. Avoid repeated freezing and thawing

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 221547(WRN Antibody) at a dilution of 1/30(Cytoplasm or Nucleus).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 221547(Anti-WRN Antibody) at dilution 1/30.

The image on the left is immunohistochemistry of paraffin-embedded Human lung cancer tissue using 221547(Anti-WRN Antibody) at a dilution of 1/30.

In comparison with the IHC on the left, the same paraffin-embedded Human lung cancer tissue is first treated with synthetic peptide and then with D263188(Anti-WRN Antibody) at dilution 1/30.

Product Description

Pioneering GTPase and Oncogene Product Development since 2010
