

## XDH RABBIT PAB

货号: S221538

产品全名: XDH 兔多抗

基因符号: XO; XOR

**UNIPROT ID:** P47989 (Gene Accession - NP\_000370)

**背景:** Xanthine dehydrogenase belongs to the group of molybdenum-containing hydroxylases involved in the oxidative metabolism of purines. The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions. Xanthine dehydrogenase can be converted to xanthine oxidase by reversible sulfhydryl oxidation or by irreversible proteolytic modification. Defects in xanthine dehydrogenase cause xanthinuria, may contribute to adult respiratory stress syndrome, and may potentiate influenza infection through an oxygen metabolite-dependent mechanism.

Immunohistochemistry analysis of paraffin embedded Human liver cancer tissue using 221538(XDH Antibody) at a dilution of 1/40(Cytoplasm).

In comparison with the IHC on the left, the same paraffin-embedded Human liver cancer tissue is first treated with the synthetic peptide and then with 221538(Anti-XDH Antibody) at dilution 1/40.
