

ARL1 MAB

Ar1l Monoclonal Antibody

货号: 26056

基因符号: ARL1

描述: Ar1l-小鼠单克隆抗体

背景: Ar1l (Arf-like 1) localizes to the Golgi complex, where it is believed to recruit effector proteins to the trans-Golgi network. Golgi-localized proteins golgin-97 and golgin-245 have been shown as Ar1l effectors. Additional Ar1l effectors include the GARP (Golgi-associated retrograde protein)/VFT (Vps53) vesicle-tethering complex and Arfaptin 2. In *Drosophila* zygotes, mutation of Ar1l is lethal.
