

BAG1 PAB

产品名称: Bag1 兔多抗

货号: 21231

基因符号: BAG1

描述: Bag1 兔多抗

背景: BAG family molecular chaperone regulator 1 is a protein that in humans is encoded by the BAG1 gene. It binds to oncogene BCL2, by which enhances the anti apoptotic effects of BCL2 and represents a link between growth factor receptors and anti apoptotic mechanisms. BAG gene has been implicated in age related neurodegenerative diseases as Alzheimer's. It has been demonstrated that BAG1 and BAG 3 regulate the proteasomal and lysosomal protein elimination pathways, respectively.
