产品全名: Biotinylated Anti-GITR(DM79) 兔单克隆抗体

基因符号 AITR; GITR; TNFRSF18; CD357

描述: Biotinylated Anti-GITR antibody(DM79) 兔单克隆抗体

背景: This gene encodes a member of the TNF-receptor superfamily. The encoded receptor has been shown to have increased expression upon T-cell activation; and it is thought to play a key role in dominant immunological self-tolerance maintained by CD25()CD4() regulatory T cells. Knockout studies in mice also suggest the role of this receptor is in the regulation of CD3-driven T-cell activation and programmed cell death. Three alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported.
