产品全名: CD112(DMC224) IgG1 Chimeric 单抗

基因符号 NECTIN2; HVEB; PRR2; PVRL2; PVRR2

描述: CD112 antibody(DMC224) IgG1 Chimeric 单抗

背景: This gene encodes a single-pass type I membrane glycoprotein with two Ig-like C2-type domains and an Ig-like V-type domain. This protein is one of the plasma membrane components of adherens junctions. It also serves as an entry for certain mutant strains of herpes simplex virus and pseudorabies virus; and it is involved in cell to cell spreading of these viruses. Variations in this gene have been associated with differences in the severity of multiple sclerosis. Alternate transcriptional splice variants; encoding different isoforms; have been characterized.
